

A new generation
of access
management

Grant & Guard

Visual Access Control System

Progressive access security

Grant & Guard is a browser-based security and access control system. It can be integrated into an existing, heterogeneous access hardware environment and software infrastructure. Due to that it qualifies for large enterprises or different secured objects.

Grant & Guard impresses by its user-friendly interface. This allows an intuitive handling with minimal training effort while offering an excellent usability.

Its detailed and extensive visualisation offers a straightforward overview and a proactive alerting. Blueprints, facility maps and also individual buildings can be displayed with CAD models in any desired detail and can also be monitored and directed in real time.

Grant & Guard supports numerous interfaces to several systems and standards. Personal master data, authorisations, guest data or room occupancies can be linked with existing systems. As a result of a detailed application authorisation, the solution is ideal for security companies with a broad customer base as well as enterprises with a complex access right system.

Grant & Guard does not just configure security zones but also access hardware. Thus, changes can be realised fast without complicating the implementation.

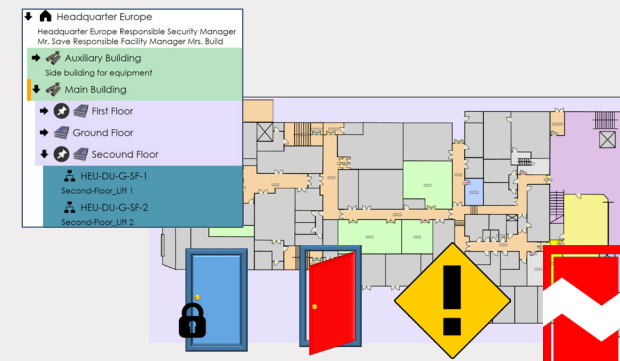

From creating and administering users and groups to creating zones and time frames up to configuring alarms and the individual allocation of access rights – Grant & Guard unites all relevant features. Everything that is necessary for a smooth and simple access control is offered in this intuitive and user friendly application.

Grant & Guard opens every door – when and for whom is up to you!

Grant & Guard: A short overview

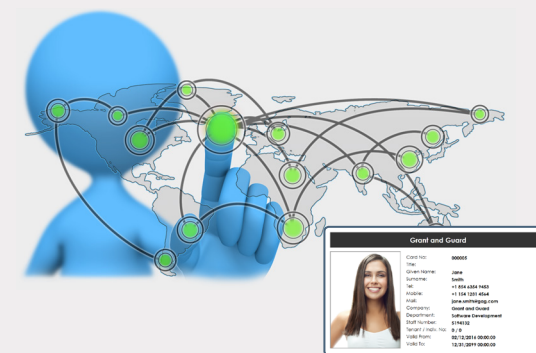

User-friendly interface

- Efficient user guidance
- Logical links
- Intuitive symbols

High compatibility

- Manufacturer-independent access hardware
- Mobile access
- Integration into existing systems

Alternative access authorisations

- Zone-based rights distribution
- Matrix-oriented rights administration
- Remote door control

Detailed visualisation

- Real time display of critical alarms
- Object maps in any desired detail
- Configurable status information

Control and surveillance in real time

- Distribution of tasks across locations
- Configurable alarm processing and escalation
- Gatekeeper function with picture ID

Grant & Guard

Access control and facility surveillance

United to serve you

UMa Soft sets great value upon function-oriented software that offers the customer a maximum degree of influence on individual user guidance while holding on to standards.

Easy to understand tutorials and the respective licences enable the customer to expand solutions independently and to adapt them to their individual needs.

In its role as an implementation partner, 3Txpert realises projects on the basis of UMa Soft software. With the expertise from having worked with CrossLoom, Grant & Guard and especially access management projects for many years, 3Txpert is predestined to ideally implement the customer's wishes in a project.

3Txpert is the development partner of UMa Soft and strongly involved in the further enhancements of Grant & Guard.
