

Illuminate your
Enterprise
Architecture

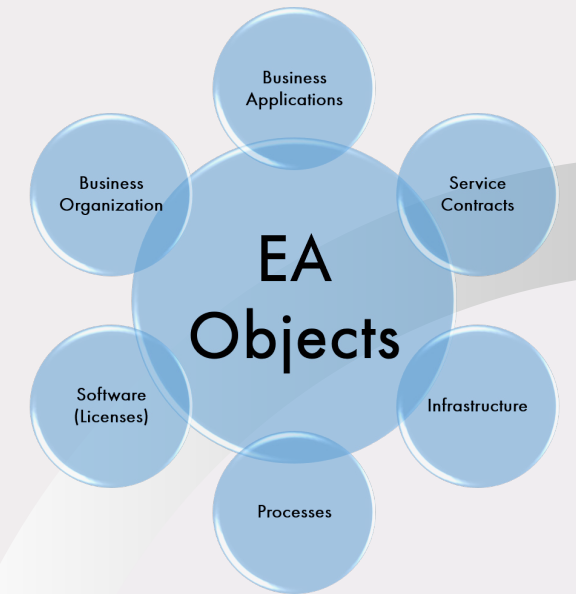

SIAM to design your Enterprise Architecture

Increase your **value for money** in the IT. Take the **driver seat** for your IT investments. Use the advantage of the information SIAM provides to **control IT demands**.

With your **enterprise DNA** and the **heart of SIAM** your enterprise architecture will come to life. Adapt to your needs, **customize** to your wishes.

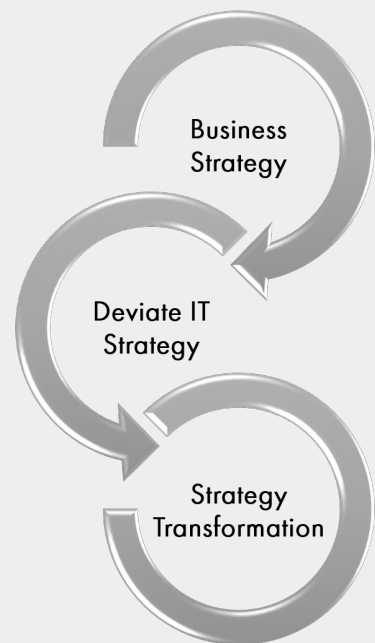

1. One for all and all for one

- Increased data quality for **better planning**.
- **Well-founded decisions** including the aspects of all stakeholders.
- Faster responses to change requests and audits due to a **broad data availability**.

2. For the business

- **Transparency** about all dependencies within the enterprise landscape.
- More **direct involvement** of the business in the IT Strategy.
- **Straight argumentation** about the outcome of the strategic and operational measurements, based on **business needs**.

Gather

Collect data step by step from different perspectives in the order that fits best to the current availability of data and staff

Use

Use the data to analyze need, to explain necessities and lead your stakeholders to a common goal

Gain

Fast response to business and high value for money ratio due to perfect fits of changes to the existing enterprise landscape

3. Manage Enterprise Architecture

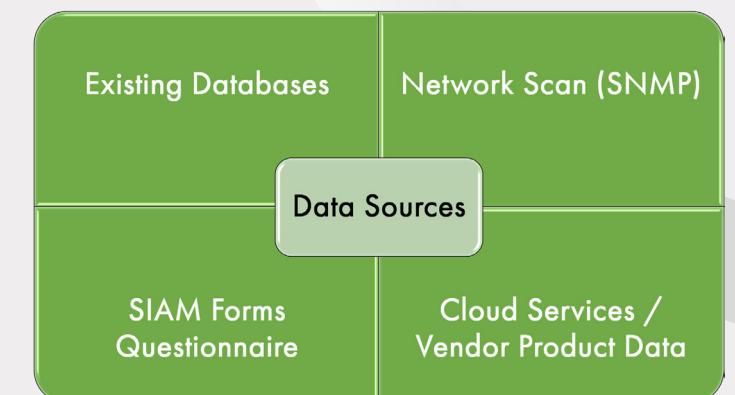

- Sustain configuration items (CI) and their **relations**.
- Display information units like **IT value** and **real-time data** for each CI type (e.g. application, process).
- Assess your Enterprise Architecture **maturity**.
- Analyze object dependencies and **evaluate risks**.

4. Low Effort Data Maintenance

- **Collect and integrate existing data** once or repetitive with CrossLoop.
- Connect with CrossLoop to **external sources** like vendor product DBs to enhance the meta data.
- Guide departments, project managers or vendors via **SIAM forms** to gather additional data.

With SIAM, your company can focus on its **core competences**. That way, an efficient use of valuable resources is ensured.

A fast, **high quality recording, managing and analyzing** of the enterprise architecture can be done **effortlessly**.

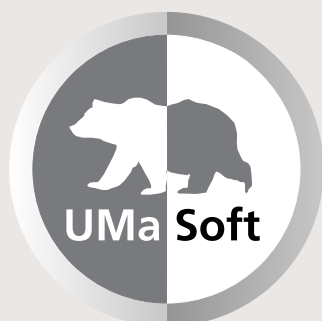

SIAM

IT value optimization

United to serve you

UMa Soft conceptualized SIAM in the first place for its IT Strategy as well as Merger & Acquisition projects. Now SIAM is released for Enterprise Architecture and a full scope IT operation including the visibility of the past, the present and the future. Planning as well as Operation features are supported with this versatile instrument.

UMa Soft gives you the tools and the consulting to strengthen the IT as a supporting but equal partner to the business departments.

In its role as an implementation partner, 3Txpert realizes projects on the basis of UMa Soft software.

The skilled and experienced developers working for 3Txpert configure SIAM fast and efficient to fit the individual requirements of your company. Also they will create necessary workflows with the CrossSystem Workflow, to proactively initiate tasks as you need them. Furthermore, 3Txpert is a reliable partner who will be able to provide interfaces for your existing environments such as software distribution systems, monitoring tools or accounting and cost assignment applications of any kind.
